

## **Fossil's Alive!**, November 2, 2006

**Russ Bellinger** (Dunedin, Florida USA) -

Great to hear Roger back in the pocket with an interesting new band that (of course) is very electronic. Different from his earlier releases, but equal on talent and originality. I will admit I had to listen to this about 3 times before it absorbed into my being. Yes, I have seen Roger perform many times with TR's **Utopia** back in the 70's and 80's. His presence has really been missed since that time. I can't believe it's been so many years since "**Air Pocket**" was released! **Fossil Poets** is an interesting band and I hope that they continue to record because I see and hear a lot of potential for future development with this band. *Meanwhile I am really enjoying hearing this brilliant keyboardist again.*
